

M1117 ASV...

BEHOLD THE FOOTHOLD!

PS 704

The foothold on the side doors of the armored security vehicle (ASV) is a handy place to step when you exit the vehicle. That is, as long as your boot doesn't get stuck in the foothold!

When you're ready to exit the ASV, place your foot on top of the foothold. Do not place your foot inside the "loop" of the hold. That way you won't get stuck, twist an ankle and land on your face! This also keeps Soldiers from falling on top of you or your getting in the way as they exit the vehicle.
