

SHED SOME LIGHT

Door handles and escape hatches inside MRAP vehicles are hard to see, especially in the dark, because there's little color contrast between the handles and surrounding area.

You can shed some light (or glow) on the situation by adding a strip of pressure-sensitive tape, NSN 9390-01-573-0835, in the right places.

Inside the MRAP, place the tape on the escape hatches and doors like so:

By the way, this tape works on composite and non-metallic surfaces. Just make sure you use a clean rag and alcohol wipes to clean any dirt off the area where the tape is being applied.
